EVDS - Self Enrollment Portal

27 January 2020
Online Vaccine Self Registration for Healthcare Workers

EVDS Self Registration

Thank you for registering!

Register once more
Overview of information requirements

In order to receive a vaccination appointment, individuals will be required to register using the online portal.

Individuals will submit general information, as well as information about their place of work.

This will be used to match them to a registered vaccination service point when the vaccine is allocated.

Information provided on the portal will also be used to communicate with individuals about the vaccination program when necessary, through this application.

All healthcare workers, public, private, clinical and non-clinical should register online on this platform.
The HCW Vaccinee gets an SMS presenting with ID book and Medical Aid details and Vaccination Code included in the SMS.

The vaccinator confirms that the person is eligible.

The vaccinator administers the vaccine, captures the required info on EVDS – record the Vaccination Code. The HCW receives a message that they received the 1st dose of the Vaccine and schedules the 2nd dose appointment.

The process is complete.
How will you know when portal is live

There will be extensive communication to inform Health Care Workers through different platforms and Mechanisms

• Social Media
• Professional Organisations
• HCW Employers
• Labour Unions
