Gauteng government launches COVID-19 Mobile Vaccination Drive

In an effort to ramp up the vaccination programme, the Gauteng Provincial Government and civil society partners will this week launch the COVID-19 mobile vaccination drive.

The mobile vaccination drive will be launched in Ekurhuleni, Tshwane and Johannesburg.

The drive is aimed at assisting all eligible persons for vaccination to get vaccinated near their places of residence or work. Mobile clinics and additional vaccination sites will be used. Transport will be provided for those in need.

Pick-up points in different areas have been published.

All eligible persons are urged to make use of the opportunities created to get vaccinated.

Government urges persons 50 years and older to register for vaccination.

All public vaccination sites in Gauteng accept walk-ins of all eligible groups.

COVID-19 vaccines remain highly effective in preventing severe diseases, hospitalisation and death even in the event of a delta variant infection.

The Gauteng government would like to remind residents that each vaccination brings us one step closer to a better future and to the things we miss.

Let us minimise the spread of the disease and flatten the curve through compliance with non-pharmaceutical interventions. We call on all Gauteng residents to get vaccinated when their turn comes.

ENDS/
