EXPIRY DATE OF COMIRNATY® VACCINE (MRNA COVID-19 VACCINE) FROM PFIZER-BIONTECH – 3-MONTH EXTENSION ON SHELF LIFE WHEN STORED BETWEEN -90°C AND -60°C

The circulars dated 19 October 2021 and 8 December 2021 refer, indicating that the latest storage stability data reviewed by SAHPRA and the storage conditions of all batches of Comirnaty® Vaccine were extended from 6 months to 9 months when stored at ultra-cold chain storage temperatures of between -90°C and -60°C.

The manufacturer submitted new stability data to SAHPRA for review and approval. Based on the data available, SAHPRA has approved a further 3-month extension of the shelf-life for all vaccines when stored between -90°C and -60°C, resulting in a total shelf life of 12 months from the date of manufacture. This shelf-life extension applies to all Pfizer batches listed in the table attached. The extension does not apply if the vaccine doses have already been moved to -20°C and 2-8°C storage.

The table attached indicates the printed expiry date on the vials and vaccine trays and the new expiry date following this extension.

NOTE: The shelf life at -20°C storage (14 days) and 2-8°C storage (31 days) does not change; the expiry date should, therefore, still be updated as applicable when the vaccines move through the supply chain.
